ACID CLEANER FOR PORCELAIN STONEWARE SURFACES

- Acid descaler for the removal of organic and inorganic dirt, as well as polymer-modified grouts
- Non-foaming formula.
- Suitable for both mechanical and manual use.

GRES SPECIAL

Acid-based cleaner with special synergizing agents, specifically formulated to remove residues of polymer-enhanced cementitious grouts (hybrid types), including water-repellent, anti-mold, high-adhesion formulations that are difficult to eliminate.

How to use

- For stubborn dirt, increase the concentration up to using the product undiluted.
- Always perform a preliminary test on an uninstalled tile or a hidden area before cleaning the full surface.
- Pour the product into a bucket for manual use, or into a floor scrubber or single-disc machine.
- Let the solution sit for 10–20 minutes, keeping the surface wet.
- Scrub the surface with a mop, abrasive pad or melamine pad, or with an abrasive/melamine disc using plenty of water.
- Collect the dirty water and rinse thoroughly. Repeat the process if necessary.
- Do not use on marble or other acid-sensitive stones.

Dilution

For deep cleaning, dilute in water at a concentration of 10% to 30%.

Technical data

- Appearance: Liquid.
- Contains: Nitric acid.
