

Stone**PROOF**

1KG - 5KG

Hydro**SHIELD**

WATER-BASED WATER-REPELLENT FOR POROUS NATURAL AND/OR ARTIFICIAL STONE MATERIALS

Benefits

- Once applied and cured, the product imparts strong water-repellent properties.
- Its molecules bond with the substrate to which it is applied, while still allowing breathability. This enables the removal of rising damp through the natural evaporation process.
- It does not alter the surface tone and does not yellow when exposed to UV ray.

HydroSHIELD

- Water-based formula.
- High penetration and breathability.

How to use

- Apply to perfectly clean and dry surfaces.
- The number of applications and the amount to apply per square meter depend on the properties of the material being treated and must be determined accordingly.
- Functionality tests must be carried out when the treated surfaces are completely dry, at least 24 hours after product application.

Suitable for

- Natural or artificial stone materials.
- Concrete and cement.

Coverage

Evaluate according to the support to be treated

Packaging

1 L bottles (12 pcs) | 5 L cans (4 pcs)
